

## Mergado Product XML

The goal of Mergado Product XML is to set a standard for data transfer of product campaigns in e-commerce. This document lists supported elements and describes their purpose.

## Why to support Mergado Product XML

Minimum data loss during transfer from an online store to Mergado app enables a superb data conversion and advertising management on comparison shopping sites and marketplaces. Moreover, developers need to follow changes of only one data file specification instead of dozens. This saves their time that can be devoted to online store development.

## Latest version

1.9, differences compared to the previous version 1.8 are highlighted with **yellow**.

## Mergado Product XML elements

Element names are in CAPITAL LETTERS

Explanatory notes:

- „Text“ values describe regular text. We recommend avoiding control characters such as „# \$ ^ & \*“ etc.
- „ID“ values support „0-9a-zA-Z\_-“ characters. No differentiation between upper and lower case while processing.
- „URL“ values describe a file address according to this [standard](#), that is with „http://“ at the beginning, without diacritics, spaces etc.
- Date values are in the following order: „dd-mm-yyyy“, e.g. 31-12-2019.
- **Embedded elements** are in the table placed below the parent element and indented to the right.
- “Number” values are a sequence of numbers without spaces or other characters. Decimal numbers are separated by a decimal point.

Element specification follows on the next page.

See example of an XML feed below the table.

Element	Description	Values	Compulsory	Can repeat
CHANNEL	Root tag. At the beginning and at the end of XML file.	-	YES	-
LINK	URL address of the online store	URL	-	-
GENERATOR	Tag at the beginning of the XML. It defines system and version that created the XML. Please contact Mergado to be assigned the ID.			
ITEM	Marks a product item. Same as e.g. SHOPITEM from Heureka or Zboží.cz.	-	YES	YES

VAT	VAT rate. E.g. <VAT>21</VAT> represents 21 % rate.	Number	-	-
VIDEO	Product videos.	URL	-	-
VIDEO_ALTERNATIVE	Alternative product videos URL.	URL	-	YES
WARRANTY	Warranty in months.	Number	-	-

## Example

Following example shows an XML with one product item only. This product has a parameter and two different delivery types. Example does not contain all possible elements, it only suggests how the key elements work. Please watch out for BRAND and PRODUCER elements. In this example they match, as knife manufacturer of Victorinox brand is actually Victorinox company as well.

Example is based on an ecommerce:

- on [www.mergadoshop.com](http://www.mergadoshop.com) domain
- which used “[Mergado Pack](#)” module version 2.2.0 to generate the XML file. If you are a developer please contact Mergado support to get an official ID (the ID used in the GENERATOR element) for your module.

*And now the example:*

```
<?xml version="1.0" encoding="utf-8"?>
